Summary

Computer Science student currently in 6th semester with a keen interest in software development, AI/ML, and web technologies. Comfortable working with Python, JavaScript, Java, and React at a foundational level. Eager to apply academic knowledge in a practical environment and grow through hands-on internship experience in software development, web development, or AI/ML.

Education

Bachelor of Science in Computer Science

6th Semester (Continued)

2024 – Present

Lahore, Pakistan

Associate Degree in Computer Science

Relevant Coursework: Data Structures, Algorithms, OOP, Database Systems

2022 – 2024

Lahore, Pakistan

Technical Skills

Languages: Python, JavaScript (ES6+), Java, HTML5, CSS3, SQL

Databases & Backend: PostgreSQL, Supabase, Firebase, REST APIs

Cloud & DevOps: Git, GitHub, Linux (basic)

Tools & Others: VS Code, Vite, Chart.js, Figma (basic)

Experience

Freelance Web Developer

2024 – Present

Self-Employed

Remote

- Built and deployed small web applications for personal and academic projects using HTML, CSS, JavaScript, and React.js.
- Integrated third-party APIs (weather, authentication) into web projects, gaining practical experience with asynchronous JavaScript and REST APIs.
- Managed source code and project versioning using Git and GitHub throughout all development work.

AI/ML Self-Learner

2023 – Present

Independent Study

Remote

- Completed the Machine Learning Specialization by DeepLearning.AI, studying supervised and unsupervised learning fundamentals.
- Built beginner-level ML models using Python, Scikit-Learn, and Pandas for classification and regression tasks as part of coursework and personal practice.
- Explored neural networks and CNNs using TensorFlow through guided tutorials and small independent projects.

Open Source Contributor (Personal Projects)

2022 – Present

GitHub

Remote

- Developed and maintained personal projects on GitHub covering web development, Python utilities, and data-driven dashboards.
- Practiced writing clean, readable code with proper documentation and structured folder organization.

Projects

SubTrack | JavaScript, Supabase, PostgreSQL, Chart.js, Vite | [Live Demo](#) | [GitHub](#)

2024 – 2025

- Built a subscription tracking web app with user authentication (Supabase Auth), allowing users to add, manage, and monitor their subscriptions with a clean dashboard.
- Integrated Chart.js to display spending visualizations including budget comparisons, category breakdowns, and monthly expense trends.
- Added features like smart budget alerts, a renewal calendar, light/dark mode toggle, and CSV/JSON data export.

Weather Dashboard | JavaScript, REST APIs | [GitHub](#)

2024

- Developed a responsive weather app that fetches real-time weather data using a public REST API and displays location-based forecasts dynamically.

PDF Toolkit | Python | [GitHub](#)

2024

- Created a simple Python script-based toolkit for common PDF operations such as merging, splitting, and text extraction.

Portfolio Website | HTML, CSS, JavaScript | [Live Demo](#) | [GitHub](#)

2023

- Designed and developed a personal portfolio website from scratch to showcase projects, skills, and certifications.
